

- 1) Download the archive '**Analyzer.zip**' using the link below.
- 2) Open the archive '**Analyzer.zip**' and extract the files to a local directory on your computer.
- 3) Open the file '**TCL.EXE**' to start the program.

N.B. : If you obtain an error message when clicking on the '**Help**' button in the Analyzer software, you must change the default option when Windows asks you the security question whether this file is safe or you can download the following program and use it to activate the file '**TCL.CHM**' in the windows registry :
