

Warehouses and delivery
we do it differently

CONTROL TRANSFORMERS | REACTORS | DVDT FILTERS | AND MORE
transfabtms.com

As part of our determination and commitment to a continuous improvement process, we at Transfab TMS have set up a network of warehouses specifically designed to make ordering our products easier and simpler.

With warehouses in Vancouver, Calgary, Winnipeg, Toronto and Boucherville (Montreal), Transfab TMS is the only Canadian manufacturer that can guarantee the highest level of service no matter where you are in Canada.

We offer same-day pick-up and same-day shipment service.

Verifying inventory is just a click away using our dedicated Extranet via transfabtms.com.

Order easily via email, fax or phone. Personalized service? You can always be sure that whenever you call us you will be greeted by a friendly, helpful member of our staff: never a machine.

Contact us today and experience the Transfab TMS difference.

With local representation and warehouses, we guarantee the simplest, most efficient service and the best response time in the industry.

**Transfab TMS DX Series and TM2 Series transformers
are now available from stock!**

DX Series

Encapsulated-Epoxy Potted
Nema 3R Transformers

Transfab TMS has expanded its DX series epoxy potted transformers. Single phase units now available from 50VA up to 25kVA.

When you are looking for control transformers that are specifically designed for indoor and outdoor use, nothing beats the DX Series. These sturdy units are ideal for corrosive, damp, humid or dusty environments and are recommended for mechanically hazardous locations such as conveyors, elevators and extruders.

TM2 Series

Class 2 Energy
Limiting Transformers

Transfab TMS offers the most complete solution for the control industry. Now available from stock, 20VA and 40VA class 2 transformers.

This ultra-reliable design incorporates a high quality encased coil construction. Economical and compact, these transformers are designed for indoor use and can be used without additional overload protection.

These products can be ordered easily and delivered quickly using our local warehouse service.

Transfab TMS, has the most extensive and best inventory in North America. We will deliver products and solutions on time, when you need it!
